DETAILED ACTION

At the outset it is noted that the examiner of record has changed. Please direct all future correspondence to James Dooley, Art Unit 3634.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 4, drawn to a ball retainer with a strap, classified in class 211, subclass 14.
 - II. Claims 5-7, drawn to a ball retainer with a belt, classified in class 248, subclass 230.8.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have unique fastenings means, which offer different modes of operation.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Comments

The format of the amended claims submitted 02/01/2005 is improper. Deletion and addition (brackets and underlining) of claimed subject matter is not permissible together. In Claim 1 line 7 "metal" should be removed.

Also, text is not permitted in canceled claims. Therefore, all the text of claims 2 and 3 should be deleted, with the exception of the parenthetical "canceled".

For more information on formatting of amended claims see Patent Rule 1.121
